## SL20X-LED Series Mains Failure Torches

**Power Failure Feature - when the power fails the torch comes on.**

When the torch is in the charger in the "on" position, the torch will automatically come on if the power fails.

### Rechargeable LED / Halogen Combination

#### **Revolutionary patented technology:**

The LED/incandescent combination lets you choose a super-bright beam or an incredibly long runtime.

These light-weight torches feature a high-output, pre-focused halogen main beam and a trio of close-range LEDs.

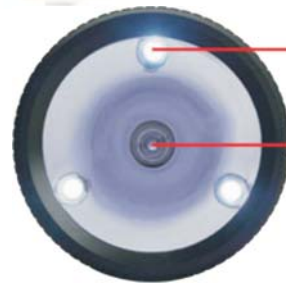

Both offer virtually unbreakable polymer construction, a non-slip rubber comfort grip, an unbreakable polycarbonate lens, and dual switch control.

#### **2-way failsafe LED illumination:**

- Runtime: The battery will support a minimum of 1 hour of LED light after the incandescent (main bulb) runs out.
- Bulb-life: Even if the main bulb burns out completely, the LEDs have 100,000 hours of life.

**LEDs provide over 100 hours of continuous use.**

**LED Run Time:**

100-plus hours

**Halogen Power:**

38,000 candlepower

**Halogen Run Time:**

1.3 hours

Battery	3 x Sub-C Nickel Cadmium
Light Source	10 watt high-intensity halogen 3 x High-intensity LED's
Light Output	Halogen - 200 Lumens 38,000 Peak beam candlepower 3 x LED's – 30 Lumens
Focus Type	Adjustable
Run Time	1.3 hours (Halogen only) 40 hours (LED's only) 1 hour (Emergency back-up LED after full halogen run)
Weight	770 Gram
Dimensions	Length 335mm
Material	Machined aircraft aluminum with anodized finish
<b>Special Features</b>	<b>Power Failure Feature- when light is in charger in the "on" position, it will come on automatically during power failure. O-Ring sealed, water resistant.</b>

#### **LED / Halogen SL-20X Rechargeable**

**20208** with two chargers, 240VAC and 12VDC for wall and vehicle mounting.

**20206** with a 240VAC Charger.

**20202** with a 12VDC charger and cigarette lighter plug for vehicle use.
