

PORTABLE LIGHTING PRODUCTS

StealthLite Rechargeable
Order Code: 2450AC

The Rechargeable StealthLite™ is a powerful indestructible flashlight with an unbreakable corrosion proof ABS body and hi-impact polycarbonate lens. Its laser spot xenon lamp module gives an extremely bright white beam, which can cut through water, smoke, fog and rain, making it a perfect light source for all applications. It is a highly recommended flashlight to be used within industrial and fire applications because it is very powerful, light weight and attachable to any work helmet. The state-of-the-art smart charger allows for a fast 3-4 hour charge time while the LED light indicates the charge state of the battery and eliminates overcharging and over heating. The Rechargeable StealthLite™ has a one handed on/off locking switch plus a heavy-duty lanyard and is water resistant (not for diving applications).

You break it, we replace it... Forever.

Battery	NiMH battery pack
