

PORTABLE LIGHTING PRODUCTS

HeadsUp Lite Series
Order Code: 2680

This is the first headlamp to incorporate Recoil LED Technology.

The 2680 Headsup Lite has an LED that is just as bright as a high performance incandescent without the annoying dark spots and irregular beam pattern caused by standard filament lamps.

Conventional LED torches generate a wide beam to illuminate a wide area at the expense of distant illumination. Recoil LED Technology mounts the high-power LED in front of the reflector at its focal point. This fires the light backwards onto the reflector so that 100% of the light is captured and reflected forward. The result is a super bright white collimated beam that cuts through the thickest smoke, dust and fog.

The LED is also voltage regulated so that as the battery voltage decreases, the peak brightness is maintained for a longer period than conventional torches.

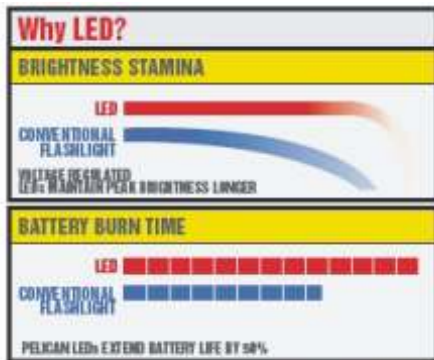

The 2680 is supplied with a cloth strap for bare head use and a heavy duty rubber strap for helmets. The head can be rotated to let you aim light where you need it

The 2680 Headsup Lite provides hands free light right where you need it, when you need it.

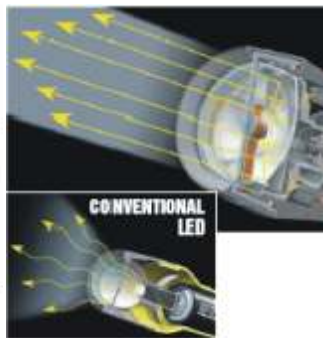

Battery	4 x AA Alkaline
Light Source	Recoil LED
Light Output	73 Lumens
Focus Type	Spot
Run Time	Max 33 hours
Weight	275 Grams
Material	ABS resin body

- Recoil LED Technology
- Eliminates dark spots and irregular beam pattern
- Voltage regulated
- Rotatable head
- Long battery burn time
- Both cloth and rubber straps included
- Focussed beam

Recoil LED Technology

*Luz: the maximum peak beam illuminance intensity measured at a 5 foot distance by a light meter

2680 Headlamp Approvals

Class I, Div. 2; Gp. ABCD; Class II, III, Div. 2 Grp.F,G Temp T4A.
