

PORTABLE LIGHTING PRODUCTS

HEAVY DUTY LIGHTS

**BIG D Rechargeable
Lead Acid
Order Code 3850LA
Nickel Cadmium
Order Code 3850N**

Pelican Big D Rechargeable was designed with two things in mind - heavy-duty and light weight. The Rechargeable Big D is 50 percent lighter than the competition so it won't weigh you down. The charger base mounts anywhere for easy access. Quick release, one hand removal from the charger base is ideal for grab-n-go situations. The AC (home) charge cord is included. The unique dual switch provides constant on or a flashing strobe for a warning signal. The Big D lays flat or stands upright and the head pivots almost 180 degrees.

A quick change battery pack makes battery replacement easy and the steel clip holds the pack securely. A stainless steel shock guard protects the lens from scratches, debris and hard knocks. The heavy duty strap fits comfortably on your shoulder.
