Fire Vulcan™ - Designed by firefighters for firefighters

The new Fire Vulcan™ is *the* safety lantern because it features two ultra-bright blue taillight LEDs that lets your partners see you when they're following (or approaching) you in a smoke-filled room. In fact, this versatile lantern is ideal for the many roles of a firefighter. It provides all the benefits of the original Vulcan® (powerful, lightweight, and waterproof), but now offers even more advantages.

Features of the Fire Vulcan:

New. The only lantern with 2 taillight LEDs. Offers 2 modes: "steady" and "blinking."

New quick-release strap.

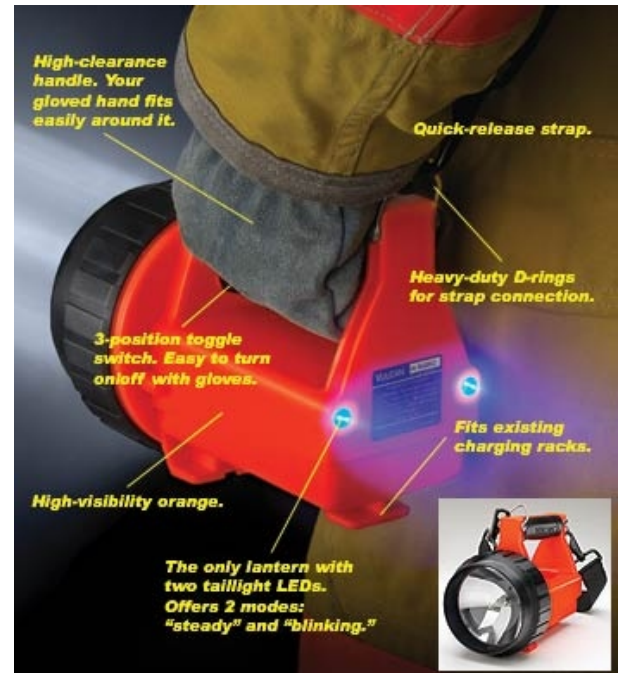

New 3-position toggle switch. Easy to turn on/off with gloves.

New high-clearance handle. Your gloved hand fits easily around it.

New heavy-duty D-rings for strap connection.

New. High-visibility orange.
Compact & lightweight. Weighs only 1.5kg.
Extremely powerful: 65,000 candlepower.
Rugged, high-impact thermoplastic housing.
Waterproof.

Accessories: 120V, 230V or 240V AC (home) and RV DC (automobile) charging cords.

Runtimes of the new Fire Vulcan:

"Steady" mode (LED & halogen bulb): 3 hrs.
"Blinking" mode (LED & halogen bulb): 6 hrs.
"Blinking" mode (LEDs only): 60 hrs.

Applications of the versatile Fire Vulcan:

Identifies firefighters coming and going even in smoky conditions.
Warns motorists and increases visibility in traffic/accident scenes.
Marks emergency landing areas for incoming helos.
Marks entry/exitways into/out of structures.

The new 3-position toggle switch makes it easy to turn on/off, even while wearing gloves.

The new high-clearance handle comfortably accommodates your gloved hand.

New quick-release strap works like a seatbelt buckle. Use it to release or connect shoulder straps fast and easy.
