

PORTABLE LIGHTING PRODUCTS

Junior Reach C4 LED
Order Code: 71600

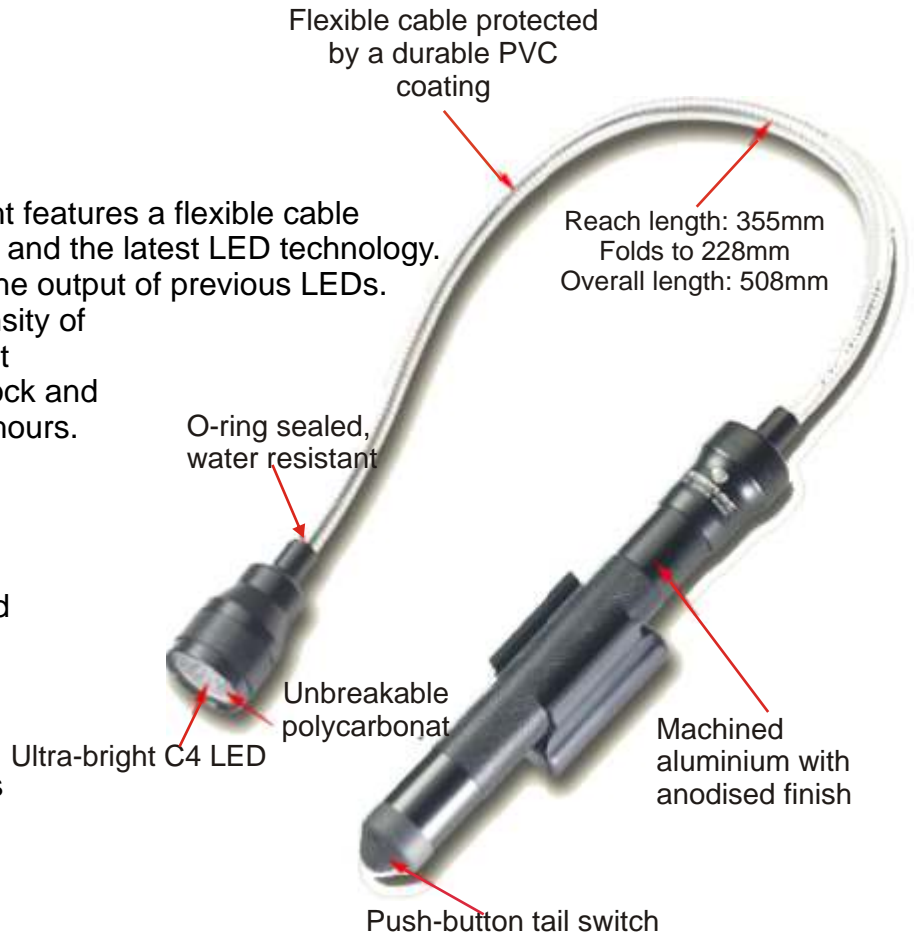

Junior Reach C4 LED

This ultra-small, lightweight flashlight features a flexible cable protected by a durable PVC coating and the latest LED technology.

New C4 LED's produce 2-3 times the output of previous LEDs.

The C4 LED has a peak beam intensity of 1600 candlepower and a light output of 55 lumens. It is impervious to shock and has an expected lifetime of 50,000 hours.

The Jr. Reach C4 LED torch is also maintenance free. You'll never have to change the bulb or deal with bulb replacement costs. Remarkably handy, it's as compact as a pen, and offers a push-button tailcap for steady "on" and momentary on/off. Plus, with its machined aluminum construction and virtually unbreakable polycarbonate lens, it's incredibly durable.

Ultra Small

Incredibly durable

Up to 55 lumens

Lightweight: only 180 grams.

Machined aluminum

50,000-hour C4 LED
